DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 8-10, drawn to a semiconductor device, classified in class 257, subclass 779.
- II. Claims 7, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 612.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the group I invention could be made by a materially different process. For example, the device can be formed individually, instead of separating each individual piece by cutting the semiconductor substrate and the resin film.

Because these inventions are distinct for the reasons give above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
